Revolution

June 9 – 13, 2010

Dear Parents,

I kid you not, there is literally a revolution taking place in many students' hearts and among local youth groups – a revolution that I want every student to know and experience and join.

In years past many churches were guilty of competing against one another for size, influence and fame. To the outsider looking in, many churches seemed infatuated with themselves and cared little to meet the needs of the people and community around them.

This is all changing…and this is the revolution of which I speak. Students are hungry to live the lifestyle Jesus modeled for us: a radical lifestyle that loves the unlovely and cares for the outcast. Students care little about comparing their youth group or church with others. They want churches to work together, to serve together, to love each other, and to meet the real and urgent needs of the community around them. This same burning passion is aflame in many youth pastors' hearts as well.

The fire has turned into a movement and the movement is now a reality. We're calling it Revolution of Love. Multiple churches and hundreds of students will join hands this June to make an impact in Lake County.

From the website (www.revolutionoflove.net):

> This Revolution is a revolution of LOVE. It's about taking Jesus' revolutionary love to the streets. It's about Christian teens living radically – like Jesus calls them to, making an impact here, now, serving the community and those in great need. It's about high school students from many different churches uniting as ONE for one cause: God's mission on this earth.
>
> Revolution is a five-day high school only local impact mission trip. We come together to serve, to learn, to worship, to pray, and to love each other, all with a great passion to make Jesus famous and to live the transformed life found in God's Word. Our prayer is not that this event will end when the week ends, but will be a lifestyle that we embrace through the relationships we build and the mission we've begun.

Visit the website for more information and to view a video from last year's event.

Changing the world together,
